Measure: SB566

The summary text statement of this bill is so badly worded, I am still struggling to figure out the intended meaning. No matter how well intentioned, I must oppose this bill, on the grounds that I can't understand what it is attempting to convey, and I don't think another reasonably intelligent adult can understand. There is too much room here for misunderstanding. It needs to be completely rewritten for clarity. I have already read testimony, and spoken with others, who all have completely opposing interpretations as to the meaning of this bill.
