

Submitter: Eric Meurer

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB2137

When I first came to this area in 1973 the question of a third bridge was being actively discussed and studies were being done. Here we are 50 years later. We needed that bridge then and need it much more now. I hope you will do more than create another study, but take real steps to build something.
