

Submitter: Lorna Torrey Palermo  
On Behalf Of: Myself  
Committee: House Committee On Rules  
Measure: HJR5

To: The Oregon State House Committee on Rules

Oregon is the home of many unique plant and animal species. Their safety, protection and natural habitat cannot be compromised. As catastrophic drought, wildfire and erratic climate events must be mitigated in real time, it is essential that Oregonians retain the right to protect, improve or modernize the protections for our wildlife and wild spaces through our right to use the ballot initiative process.

Thank You for your consideration.
