

Submitter: Julie Sanford
On Behalf Of: Fossil Distance Learning Solutions
Committee: Senate Committee On Education
Measure: SB767

I strongly oppose bill 767. Students all over the state of Oregon need as much support for their chosen way of pursuing education as possible. Our public school districts in Oregon have failed to meet the needs of students, especially those who struggle to meet the classroom management requirements of the typical classroom. Restricting student access to alternative educational structures is foolhardy. We want to see ALL Oregon students thrive and receive a high quality education no matter their geographical locations.
