

I would like to state I oppose this bill. City View has worked for years trying to find a stable and secure place for our children. A lot of the kids have been hyped up for a building where they all can reside and learn and play. Passing this bill in the way it is written crushes the whole City View community. We stand together and would love to see our kids have a playground and a set place. Please build an amendment where it will still allow us to continue build a dream.
