

Submitter: Samuel Bogdanove
On Behalf Of:
Committee: Senate Committee On Education
Measure: SB767

As a lifelong advocate for public education and all of our kids, I am grateful for the common sense approach of this bill to the absurd notion that a non-virtual charter can be placed in a non-sponsoring district without consideration of the impact on the students and schools in that district, and without any accountability to or consent from the local school board. As currently written, charter law flies in the face of local control and what is best for a community. This bill would ensure that communities and school boards have a reasonable degree of local control and are not at the mercy of a non-virtual charter sponsored by another district.
