

Submitter: Stephen Gessling

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure: HB2571

E-bikes are completely revolutionizing transportation in cities and providing easier access to them will only improve the lives of Oregonians. Not only will E-bike purchasers benefit from their new mode of transportation but car drivers will also benefit from fewer cars on the road leading to less traffic, shorter time spent looking for parking, and all sorts of other problems that can be attributed to too many cars. Other states have had tons of success with similar programs and Oregon would be no different.

Thank you for your consideration
