

Submitter: Doug Scott

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB767

If this bill passes without any exceptions then it will mean the end of my children's charter school. My daughter and son attend City View Charter School and their lease will end at the end of the school year. They have secured a new building to buy that is 0.5 miles outside of their schools districts boundary. This bill will prevent them from purchasing their forever home. I plead that you make some exceptions should the bill pass, such as "within so many miles of the districts boundary". So that schools can operate ever so slightly outside of their boundary. Or that the student body still needs to be made up of a certain percentage of students from within that boundary. Just something that would allow current charter schools to continue operating and serving their students.
