On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure: HB2867

I OPPOSE HB 2867 creating a new agency with divisions, advisory and technical committees. At a time when the state is short on funds, it shouldn't even be a consideration of growing government. This is scientific work that should be done in research laboratories or a university. We don't need an agency to oversee and try and control scientific work. True science can't be directed. It is what it proves to be.
