

Submitter: Gilda Lorensen
On Behalf Of: Self and all Oregonians
Committee: Senate Committee On Health Care
Measure: SB704

I'm a retired OBGYN physician. I've served patients in several states over 40 years. Our American lack of a universal health system is devastating to the health of so many. In 2023, there is no excuse for our lack of compassion and care. Also, it's hugely cost saving for our society to provide basic care to all, preventing unchecked disease advancement and spread of infections, among other benefits. . Why are we so blind to these benefits? Everyone deserves basic health care. Please move forward with Universal Health Care in Oregon as quickly as possible. Thank you.
