On Behalf Of:

Committee: House Committee On Early Childhood and Human Services

Measure: HB2457

At the tail end of 2019 I was a client at the Albertina Kerr subacute facility and it had a profound effect on my mental health and thanks to the DSPs there I was in a much better state of mind leaving the facility after a month of 24hr care. The impact it left on me was a major deciding factor in wanting to be employed with Albertina Kerr and give back the help I received and possibly be a positive role model for the youth in this program.
