

Submitter: Kathryn Joylove

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB70

I'm opposed to making this change and allowing housing developments to be built on this land. Oregon is so rapidly losing open space surrounding towns and cities and also on more remote natural lands that are important to wildlife and native vegetation, all to bring in more people and their developments. We need lots of farmland both to grow food on and to leave open and wild for nature as well as for human's peace of mind.
