

Submitter: Alasdair Crawford

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure: HB2571

Rebates for e bikes are some of the most cost effective ways we can fight climate change via reducing auto dependency. The day I got my e-bike, I sold my car. It is a simple, cost effective, and climate friendly replacement for all of my car trips. We simply can't continue subsidizing people to carry 4000 pounds of metal with them where-ever they go.
