

Submitter: Michael Hangland-Skill

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure: HB2571

I support this bill! I have been waiting to buy an E-bike until we could get some sort of rebate or credit. I currently can't just shovel out the money for any big purchases, but I sure will make this investment with the prospect of a rebate. In terms of use and commute, and e-bike would make for an quicker trip each way than transit and driving. As for the environment, it would greatly reduce my dependence on my car. Finally, I think an e-bike would be a joyful and positive addition to my life. Please pass this bill!
