

Submitter: Amy Madrigal
On Behalf Of: My granddaughter Quirina
Committee: House Committee On Revenue
Measure: HB2089

Taking away money from ballot measure 110 spending is like allowing more children to be more an opiate addicted I am the grandmother of a child who was born to opiate addiction she was ill addicted to bentonal that it took 12 hours for her to detox she was in the hospital for a month. It's not just affecting the adults it's affecting our children it's affecting families and if you take this money you too are part of the problem. Don't take something away that has not had a chance to show yield yet give ballot measure 110 the opportunity that it needs to show change change is not instant it takes time. Give people the opportunity they need to change and grow and allow us to do our job. Changing lives of children making babies that were born addicted have an opportunity to not have to be born addicted anymore let us serve our communities and serve the still suffering addicts.
