To Whom it May Concern:

I am writing to support SB 594. As a contractor working in the demolition and hazardous waste removal industry, this bill will help level the playing field for contractors. As a business, we believe that closing loopholes to prevailing wage in public procurement helps create a more predictable and fair bidding environment.

Additionally, we believe this bill will serve to create more stable employment opportunities with good wages and benefits for workers employed in these industries. As a business, this will help us maintain and retain a skilled workforce.

We urge you to support this bill, and to ensure public procurement benefits both businesses and workers in the demolition and hazardous waste removal industry.
