

Submitter: Janice Flegel
On Behalf Of:
Committee: House Committee On Revenue
Measure: HB2624

Chair Nathanson and Committee Members,

I ask you to support HB2624.

Every year the Citizens of Oregon file taxes. We pay those taxes on the money we earn. We try to be responsible with the money we earn as we build for the future. When the last day of our lives come we don't want the money that was earned and that we paid taxes on to be taxed again when we die. It puts a burden on our children and grandchildren. As a farm owner we want the land to be farmed by our children and grandchildren. We agree that the estate tax exemption needs to be raised and adjusted for inflation annually. This will help to keep our family farming in the future should my husband and I die.

Please support HB 2624, its the right thing to keep family farms in the family.
