

Submitter: James King

On Behalf Of: DSPs

Committee: House Committee On Early Childhood and Human Services

Measure: HB2457

Our support of in need individuals is key to their quality of life. Without our DSPs these in need individuals wouldn't have the quality of lives they have and that is very important as human beings. Most if not all of us don't make enough money to support our quality of life and work 2 jobs. DSPs are under rated and underpaid. I guarantee if the powers to be were in need they'd want happy supported DSPs taking care of them. Not tired frustrated from working constantly. Please help us take care of ourselves as well. This raise is a game changer not only for us but for the in need individuals we support. Thank you
