

[Foam Foodware: SB 543](#)

I write to you as a concerned citizen of our State but also as someone who volunteers countless hours to cleaning our beaches and highways. I strongly encourage eliminating foam food ware. I have picked up more polystyrene food containers from our roads, beaches and streams than I could possibly count. Eliminating this source of trash is a step in the right direction for Oregon. Please do all you can to get this legislation passed.

Thank you for reading my comments,

Jill Marks
