

Submitter: Matchu Williams

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure: HB2571

Dear House Committee On Climate, Energy, and Environment,

I support HB 2571 and urge taking action to uphold the state's commitment to sustainable transportation investments. Electric micromobility reduces greenhouse gas emissions and creates mobility choices. The Electric Micromobility in Oregon study from the Climate Office at the Oregon Department of Transportation identifies five barriers to the adoption of e-micromobility devices, with cost being one of the key barriers. The proposed legislation lowers this barrier and benefits local economies while keeping revenue within the state. Please pass this crucial piece of legislation.
