

Submitter: F Diaz

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2994

It is nothing wrong being deaf. There are many access nowadays than old time. Some people don't like wear hearing aids or cochlear implant. It is really their choice not audiologist or parents to make decision! For me, I couldn't wear it because it gave me headaches. I don't believe deaf should wear hearing aids or cochlear implant that not gonna help them. For hard of hearing or hearing loss due to age that is different story! Learning sign language are awesome & nothing to be ashamed of... Be blessed
