

Dear Members of the House of the Oregon House,

I implore you to vote against this measure that guts funding for measure 110.

Are you not the people's House? As such, you should not balk on your promise to the people, especially not the funding for measure 110, which was voted on and approved by a solid majority of the people themselves!

This program is in its infancy, a major cut like this would debilitate it to the point of it not being able to render any good for the public, thus squandering most resources already spent on it. You'd be throwing out the baby with the bathwater.

Finally, if you are serious about tackling our critical houseless problem, you will wind up spending at least this cut times 500% percent just trying to deal with the large percentage of the houseless population that is either abusing or addicted to drugs.

Again, I implore you to vote against this measure in order to uphold the will of Oregonians!

Yours truly,
Henry Exerjian
