

Submitter: Michelle c

On Behalf Of:

Committee: House Committee On Early Childhood and Human Services

Measure: HB2457

i this that it would be a blessing if the people of all health care occupation to get paid more i have a family of 5 and i do a lot of work with (DSP) Direct Support Professional work, and i feel like i pretty much live at work and i don't even get paid enough to have extra spending money because everything is so expensive, and food is so expensive i cant even feed my family healthy items so they eat junk and boxed foods all the time which makes me feel like a failure so yes i support this and i wish that everyone would take their time out and and write something out and support this
