

Submitter: julie Vargas

On Behalf Of: DSPs

Committee: House Committee On Early Childhood and Human Services

Measure: HB2457

The support DSPs give allows better quality of life. Not only do we provide help, but we build connections with the client and the family we work with. Without our hardworking DSPs not only are you taking away a person they can trust but also taking away the quality of life they deserve. DSPs are highly under rated. We strive to give our families the quality of work they deserve. With the raise that is up for grabs it will be a complete game changer. It will help us to not be as tired from working over time, just to be able to have enough to provide for ourselves. With happier DSPs the outcomes for the families will be better. The quality we will provide will exceed. We will do better than we have been doing with this possible change.

Thank you.
