

Submitter: Kailani Brown

On Behalf Of: Dental assistants

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2996

All assistants should be required to understand and pass radiology for the good of the patient. This will become a very big problem if requirements are not met. There will be a division of undereducated assistants and disgruntled assistants with the radiology background education and less pay. Stop dumbing down the importance of the job. Education, knowledge and skill are very important. Please do not change anything or it will change the scope of practice.
