

Submitter: Dana Stroud
On Behalf Of: Gresham
Committee: Senate Committee On Health Care
Measure: SB704

This is a critical measure to support Oregonians because our healthcare systems are not equitable. Too many people suffer repeat er visits because they fall between the system cracks and do not get the preventative health supports they need. Its expensive for the rest of us, who absorb those costs, and more importantly it results in increased human suffering for those individuals. Do better.
