Submitter: Dustin Deckert

On Behalf Of:

Committee: Senate Committee On Health Care

Measure: SB704

The only reason I have healthcare right now is because of Oregon's state healthcare system, as someone who has chronic health issues due to work related injuries and unfortunate genetics its been a life saver. But it isn't perfect and I believe that a universal healthcare system could and would fix those issues. I fully believe that the healthcare I receive has saved my life and vastly improved my well being and has allowed me to put my time and energy into being a more contributing member of society rather than being worried about how I am going to get my health in order and I think that if everyone could be in a situation like that then great leaps towards everyone being able to get to a place where they can contribute to the best of their abilities. If America truly stands for life, liberty, and the pursuit of happiness then universal healthcare is the lifeblood of that ideal and it needs to happen.
