

Submitter: Rebekah Rattaro  
On Behalf Of: Oregonians  
Committee: Senate Committee On Health Care  
Measure: SB704

Having universal healthcare would release our family from the grips of corporate America which forced us to work to keep our family's safe through insurance. We would be able to start a small business without the financial burdens of shouldering health insurance costs. All people deserve access to healthcare. It's an investment into the overall health and wellness of every aspect of our community. Nobody should go bankrupt and loose their home for not having health insurance, nobody should not be able to eat because they can't afford insulin.
