

Submitter: Julie April

On Behalf Of:

Committee: House Committee On Rules

Measure: HB2585

From my experience I have noticed that people under the voting age but able to get a driver's license get ballots which they should not!

Also, they are not registered correctly which causes them to be confused as to why they didn't get the proper ballot. Most voters, especially those new to Oregon, do not know that they can go online to view how they are registered.

The idea of having DMV register voters is good, but it only is as good as the person doing the data entry. Unfortunately, they are very busy and that causes them to rush and not verify that what they entered was correct. Many voters feel how they register is personal and don't want a stranger entering it.
