

Submitter: Dyann Myers

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2458

As a parent of one and grandparent of four adoptive children all exposed to great trauma and placed in the foster care system prior to coming into our family - I plead with you to not pass this bill. Let trained, compassionate therapists do their jobs. Affirmation only will not tease out the co-morbidities found in many of these young adults and the most current research finds that affirmation and rapid transition harms. Please consider watchful waiting to be a valid, respected and professional way to care for our vulnerable loved ones. Thank you for your careful consideration of this bill.
