

Submitter: Colby Herring

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB812

I oppose this bill as a member of the Columbia Gorge Aeromodelers AMA # 3940. Flying RC aircraft is a way of having good clean fun with the community as well as introducing a hobby to young people of the next generation. This hobby inspires people young and old to be creative, good problem solvers and introduces people to electronics in a way that inspires them to plan futures in a field of electronics which can provide a lifetime of income and security.

In any interest group there are bad apples. There are car groups, people who just want to have nice cars or hot rods. Most people drive responsibly while others do not.

Don't take away a place for people to enjoy a hobby because of a few bad apples.
