

Submitter: Tiana Dwan

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2996

HB2996 will take the integrity from the assistant profession. In my 10 years of being an EFDA I am proud of my skills and knowledge of dental radiology. Knowing and sharing with our patients about radiation health and safety allows us to build rapport and confidence within our clinics and profession. It is deeply troubling to remove tests that were created to measure the knowledge of safe practices. Please do what is best for Oregonian's health and do not pass this bill!
