

Submitter: Miranda Liggio

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2458

Trans affirmation sets children up to a lifelong process of medicalization, mutilation, and serious complications. I reject affirmative care and believe that trans youth should be supported to be comfortable in the body they were born in well before the idea of medicalization and transition are options. We are leaving so many people mutilated and traumatized and regretful through affirmative care. It is serious malpractice and evil and must be stopped! Protect our youth
