Measure:                 SB812

Here we go again. I am trying to come up with a rational of why take off and landing of UAV in parks is a special problem in all parks. Is overflight OK?

Model aviation has immeasurably done more good than harm since 1900. Model aviators are among the most self regulated groups anywhere. Why this, Why now.

Please consider a more reasoned approach of only restricting model aviation for good cause where it makes sense. This shotgun approach of lawmaking is just lazy.
