

Submitter: Chad Kernutt

On Behalf Of: WE THE PEOPLE

Committee: House Committee On Climate, Energy, and Environment

Measure: HB2215

Dear Lawmakers,

My name is Chad Kernutt and I urge you to support HB-2215. Nuclear is the best green energy option for the environment. It is the cleanest and most efficient, reliable, and dependable green energy source that we have to use. The runner up best option is hydro and even that's been under attack by the Democrats dam busting pursuits. Solar and windmill energy producing options are dirty for the environment and not reliable or dependable yo support the demands of our power grid. Not to mention they make us reliable on China and the proceeds of buying the products goes straight to Xi Jinping's Chinese Communist Party. Nuclear is the best most reliable source that is not oil/gas related and its the cleanest of the 6 options. With all the safeguards that have been developed to make it withstand natural disasters it is a sure no brainer. Please support HB-2215. Thank you.
