

Submitter: Tom Hastings

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure: HB2215

Nuclear power has never, and will never, be sought by any utilities except for the existence of the Price Anderson Act, which caps damages for any nuclear accident or other disaster. There is no actual legitimate reason, then, to contemplate allowing any activity that cannot be insured. Nuclear power, nuclear weapons, nuclear waste--all unisurable. Why allow tech that is so catastrophically risky that it is not coverable by those who employ actuaries to determine risk? Off loading the risks to the people of Oregon is absolutely unacceptable.
