

Submitter: E Klein

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2458

As a preschool teacher I've seen children have phases where they have act as the opposite gender. This does not mean we should give them hormones and surgery. It means we have feminine boys and masculine girls. Please do not ignore the truth of the harm done by this practice of gender transition, especially in children. Anyone who supports transition in children has blood on their hands.
