

Submitter: Alexandra Bruckner

On Behalf  
Of:

Committee: House Committee On Emergency Management, General  
Government, and Veterans

Measure: HB2601

HB 2601 is a strong no for me. This is leading the state down a very dark path that will only hurt us. This bill is steeped in ESG language and hurts hardworking families who have entrusted their retirement funds to be invested in a strategic way that benefits them. By passing this bill, you will not only disincentivize further ingenuity in coal, gas, and oil fields that work to give us the energy we need to power our homes and lifestyles, but you will also be shooting yourselves in the foot by divesting of these sources before we have built a power grid that can sustain the lifestyle you wish us to achieve. This is a dangerous game you are playing with other peoples' hard earned money and at a time when our economy is struggling to recover and we are buying gas and oil from foreign enemies. Shame on you. I strongly oppose HB 2601.
