

Submitter: Kath Stanton

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2458

TO WHOM IT MAY CONCERN:

Conversion therapy is trying to convert a homosexual to be a heterosexual. This has no connection to the current issue with suddenly rise in teens and young adults claiming to be in the wrong body. This kind of claim need to be EXPLORED VIA THERAPY before any medical intervention is undertaken. These interventions are not reversible and have many many damaging side effects. This exploration in therapy is NOT CONVERSION THERAPY. Please correct the language of the bill. It is patently a misnomer. I oppose it.
