

Submitter: Greg Miller

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB199

Hello, We are small property land owners with livestock and pets that we depend on to help manage our property. We worry that further restrictions on predator control will limit our ability to protect our animals that we depend on for management and care of our property. We hope you can see this limiting ours and others from protecting our way of life as well as our animals will be a detriment and a further burden on us all in rural areas. Therefore we oppose SB199. Thanks for your time .  
Greg Miller
