

Submitter: Joseph Miller
On Behalf Of: Dallas Wingdingers radio control club
Committee: Senate Committee On Natural Resources
Measure: SB812

I have been flying Radio Controlled aircraft for over 12 years now. I fly under a Community Based Organization, Academy of Model Aviation, (AMA). I belong to two clubs that fly all types of aircraft. We support flying safely and responsibly. People who may fly in a park do so with aircraft designed to be flown in tight or limited space. Most do so in a safe manner. There are those who care not about safety, rules or regulations and do what ever they want. Do not punish the safe, responsible person for the actions of those who will not follow the rules.
