

Submitter: David D

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB812

Today we seem to want to "ban/restrict" way too many activities at our Parks. We have more city dwellers, and the local Parks are a place for people to enjoy. That enjoyment can include flying small model airplanes. This type of activity gets children interested and involved in Aviation.

I strongly feel that it's much safer to be in a park with model airplanes flying than to be in that same park with multiple dogs running around making the standard mess that's left behind. Today more than ever, Parks should be open to all citizens and all types of use.

Please, think carefully about adding "another" restriction onto the local Parks.
