

Submitter: Diane Tegtmeier

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB530

I am so please to know that your committee is considering this great piece of legislation, SB530. I'm proud to live in a state that not only counts carbon, but sees the value of our natural land and water to sequester carbon, hold and nurture soil and protect our waterways. It's all interconnected!

As one who has worked for environmental regeneration for most of my 80 years, I urge you to seize this opportunity to really make a difference.

Shank you for considering my testimony and voting YES! on SB530.

Sincerely, Diane Tegtmeier
