

Submitter: Eden Eagar

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2458

As a member of the LGBTQ+ community and as a trans man I speak in wholeheartedly support of this bill. As numerous medical studies have shown conversion therapy has nothing but negative impact. Increasing rates of depression and suicide ideation or attempts in the queer youth who undergo it.

This bills are the step in the right direction to combat the rising anti-lgbtq+ bills being proposed at an alarming rate. Protecting already targeted minority groups still struggling to consistently be awarded basic human rights deserve that much at least.
