

Submitter: Jonah Reyes

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2458

As an actual member of the LGBT community, I am in support of HB2458. Conversion therapy has been proven to be ineffective, and causes more harm than good to those subjected to it. As a medical professional who has taken the Hippocratic Oath to do no harm, I condemn this fraudulent practice and urge it to be outlawed. Let us move forward and improve mental health with self-love and supportive communities, and leave behind hateful and, frankly, useless practices such as conversion therapy.
