

Submitter: Norman Kralman

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure: HB3158

As a small business owner in the construction business that depends 95% of our current and future business on agriculture, in a market where the family farms are shrinking

and we are becoming more and more dependent on less and less farming units.

Imposing more and more taxes on so much of what these people depend on and society depends on to provide reasonable priced foods for the world. We need to be protecting these farms and farmers from more burdens on their lives and families. In my business I have off road

equipment vital to my operation and survival, now are you going tax my fuel and rubber....what about the people in Portland....tax them for their own problems.

I request you vote no on this bill HB3158
