

Submitter: Rain Estrada

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2458

As a mental health professional, I can't imagine focusing a treatment on "reversing" someone's sexual orientation or gender identity. Conversion therapy carries out the idea that LGBTQ+ people are "broken" and that they need to change- this is inherently homophobic and transphobic. I support this bill as conversion therapy does not belong anywhere that someone can call themselves a mental health professional.
