

Submitter: Moses N

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2458

Conversion therapy is an unethical practice that leads to depression, self harm, and suicide in those who suffer through it. It removes the dignity of the people who are forced through it and reinforces a social and systematic oppression of the marginalized people it targets. A ban on conversion therapy affirms the founding principles this country was founded upon: life, liberty, and the pursuit of happiness.
