

Submitter: Milo Schwartz

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2458

If anything, the United States has always honored our natural rights. If that is part of our values, why would we ever allow something to deny someone's liberty, deny someone's property, deny someone's identity, and try to forcefully convince them they aren't who they identify as. just let people do what they want. don't let crazy homophobic people traumatize children over something that doesn't work.
