

I strongly SUPPORT HB 2585! Please do away with automatic voter registration by the DMV!

I do not believe the DMV should divert their focus or resources to collect unsolicited registrations from people who may not be eligible to vote and without their consent or choice.

Doing so increases the likelihood of duplication and error, increases the number of unused ballots, bloats the voter rolls and opens our voter system to possible fraudulent activity.

Return the responsibility, focus and resources solely to the county election offices to clean up the voter rolls, manage the voter registration process and insure election integrity.

Thank you!
